

Extended Dispensing for CCMDD Patients

CCMDD: NHI initiative

KZN, Limpopo, Mpumalanga & Northern Cape Pick-up Points

Patients should continue to collect their parcels from their chosen PUP.
 Patients can return to their facility at any time if they feel unwell.
 They must return on their anniversary or birthday blood date.

How to identify patients that have received extensions on their prescriptions:

Parcels with extended prescriptions will be clearly marked with a purple alert sticker placed on the outside.

Where can patients find the collection dates for extended dispensing?

Patients can view the additional collection dates on the certified claim copy found inside the parcel.

Certified Copy of Claim
